

INNOVATIVE COMPOSITE PANEL SYSTEMS

Precision Panels

Flat Ridged Lightweight Surfaces for the Electronics Industry

Your Application.

Our Innovation.

- ◆ Experience in building ultra flat and accurate precision panels for the printer industry
- ◆ Reduce overall weight while maintaining performance
- ◆ Engineering support for tight tolerances and fixturing
- ◆ ISO 9001:2008 Certified
- ◆ Engineering and design through initial concepts to prototyping and production
- ◆ Proven experience and production reliability
- ◆ State of the art manufacturing facility and technical resources

Product Description

CCV is a leading manufacturer of innovative composite panels that can be engineered to produce lightweight ultra flat and ridged surfaces used in large format printers and other applications where tight tolerances and repeatable precision is critical.

CCV is a quality driven company with a quality commitment to cost effective on time production that is backed by exceptional customer service and technical support.
