# CCV ANNOUNCES SHIPMENT OF 100<sup>TH</sup> PRINTER TABLE FOR OCE'S ARIZONA T220

*Kelowna, BC, July 31, 2007*

CCV, North America's leading manufacturer of quality composite panels and panel systems announced the shipment of Océ's 100<sup>th</sup> printer table, which is an important milestone based on our product quality and corporate ability to meet and exceed our customer's expectations.

Sharing synergies with Océ's Research and Development Team, CCV was recently approved as an exclusive Tier 1 supplier for the Award winning Arizona T220. Océ is the global market leader in systems for the production and management of wide format technical documentation packages for architects, engineers, construction companies and manufacturers. This includes hardware, software, services and supplies that help Océ's customers move from analogue to digital, and now, on to colour and web-based document operations.

The success in performance and sales experienced by Océ demonstrates the effectiveness of CCV's composite technology and emphasizes the fact companies are striving to improve their competitive edge through implementing lightweight composites within their products. This achievement underscores CCV's commitment to provide their customers with high performance composite panel solutions that fit and function flawlessly in final product assembly while lowering production and labor costs.

"Effectively fabricating, inspecting and shipping Océ's 100<sup>th</sup> printer table is a great milestone for CCV," said Richard Luehr, Managing Director.

CCV has been involved in the design and fabrication of the Océ's Arizona printer table since November 2005. It is known for such products as the Western Star Truck Lightweight Sleeper Box and Code 3's composite Mobile Treatment Centers (MTC's).

### About CCV

CCV is North America's leading manufacturer of innovative composite panels and panel systems. Using a unique combination of advanced technologies and processes, our skilled design, production and technical support team transforms the industry's largest range of material options into composite panels and panel systems engineered to our customer's specifications.

CCV is well known for its capability to transform standard panels into complete system solutions.

CCV solutions can be used in almost any application. Examples include vehicle bodies, trains, boats, building interiors and exteriors, clean rooms, printer beds and tradeshow booths and/or displays.

As a premier supplier of quality products, CCV's mission is to exceed customer's expectations while creating an environment where every employee is recognized as an important resource.
