CCV Flat Out Does It Again

CCV “flattens” out production to produce award winning printers

30th July 2010

Kelowna BC, July 30, 2009 – CCV, North America’s leading manufacturer of quality standard composite panels and panel systems announced today the shipment of its 2,250th Océ flatbed printer panel. This marks an important milestone for CCV who broke into the ultra flat precision panel market 3 years ago by announcing their 100th Océ GT. Now, CCV has not only broken into the market, they have established themselves an industry leader in flat panel construction.

The last three years has seen great growth in the existing GT product line. The addition of a new larger XT panel shows the level of confidence that Océ has in CCV to handle their ever increasing production capacity. CCV’s product quality and our corporate ability to meet and normally exceed our customer expectations have played a major roll in building our relationship in the industry. CCV has in the past been recognized for “Outstanding Effort in Delivery Performance” for their work with Océ.

Sharing synergies with Océ’s Research and Development Team, CCV is an exclusive Tier 1 supplier for the Award winning GT and XT products. Océ is the global market leader in systems for the production and management of wide format technical documentation packages for architects, engineers, construction companies and manufacturers

Océ GT

CCV’s success in flat panel production can be attributed to being a quality driven company with a commitment to cost effective on time production that is backed by exceptional customer service and technical support. CCV’s brand promise recognizes high quality, exceptional service, and innovative design as key components to its success.

About CCV

Founded in May 2000, with a full production facility located in Kelowna, British Columbia, CCV is a subsidiary of The Eastern Company with a combined 145 years of manufacturing experience. As a tier 1 automotive supplier to Freightliner – Daimler Chrysler we incorporate a customer driven strategy throughout all operations to maximize the flexibility and level of service we are able to offer in terms of panel construction material options.

In an effort to diversify our product line, CCV has expanded its panel build range to include production into the high-tech ultra flat panel market. Our experience and innovation in this field has proved a valuable asset to our continued growth.

As a premier supplier of quality products, CCV's mission is to exceed customer's expectations while creating an environment where every employee is recognized as an important resource.
